Features/Safety

The **PowerBounce Kit** can be added to the 14ft Elite Trampoline to create a bouncier feel for anyone who is at least 100 lbs. It will also increase the user weight capacity. The PowerBounce Kit can be purchased with the 14ft Elite Trampoline or later when you want to upgrade to a bigger bounce.

StagedBounce Safety Technology is built into every Elite mat to help lessen the chance of awkward landings. This safety feature is not available on any other brand.

The **Safety Enclosure systems** will keep jumpers up to 230 lbs safely inside the trampoline. No danger of being lowered to the ground when high impacts into the safety net occur.
